

**EDMONDS** PTY LIMITED  
*Technologies for a Sustainable Future*

Edmonds is the world leader in wind and hybrid powered rotary ventilators.

Edmonds have been researching and manufacturing ventilation products for over 75 years. During this time they have sold their Australian made products all over the World, and built up an extensive amount of technical expertise, backed up by their own and independent testing, to rival any private company around the world.

Offering the widest range of ventilation products available in Australia Edmonds vents have been specified in countries such as India, Oman, Canada, United Arab Emirates, Fiji and Noumea.

Edmonds test all of their vents to AS4740 and can provide accurate, reliable data to guarantee you get what you need. As a result of their extensive testing, Edmonds is able to help in the design of your ventilation, ensuring you get the most cost effective solution available.

The Edmonds range includes Vents to suit any building ranging from homes to schools or factories to high-rise office towers.

### Residential Buildings

Edmonds is by far the leading manufacturer of residential ventilation products in Australia with a range that stretches across wind vents, solar, mains & hybrid powered roof vents as well as a range of sky lights.

**WindMaster**

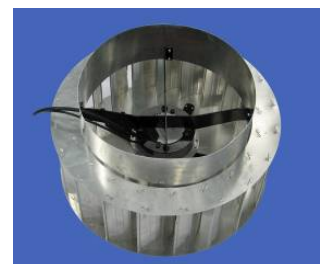

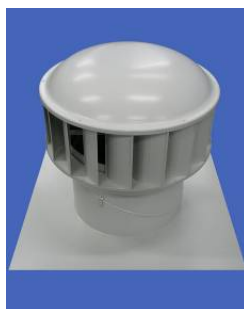

### Commercial Buildings

Edmonds manufactures 10 different size Hurricane vents, five different sizes of the ecoPOWER hybrid vents plus a range of grilles and accessories to enable design of full ventilation systems
