

EnduroShield is an easy-clean protective coating that creates an ultra-long lasting invisible shield on all glass, ceramic tiles, grout, stainless steel, and chrome surfaces reducing cleaning time by up to 90%.

EnduroShield protects against staining, build-up and etching caused by soap scum, body oils, lime scale, dirt and grime, salt and chlorine spray.

The company is accredited to ISO9001:2008 and is at the forefront of the glass coating industry. It is used extensively worldwide on both commercial and residential projects. Enduroshield was chosen to protect the exterior side of the glass spire on the One World Trade Centre in New York City. Enduroshield can be applied both at the manufacturing stage and is always available in DIY Kit form.

## Pools & Fencing

EnduroShield® is perfect for glass pool fencing and railings. The permanent\* non-stick coating will protect the glass against corrosion and etching from contaminants such as sea salt, dirt and grime, reducing cleaning time by up to 90%

## Marine Glass

Cleaning boat surfaces is an ongoing and time demanding task. Maintenance can prove difficult due to the constant exposure to sea salt and contaminants. Microscopically, glass and stainless steel surfaces have hills and valleys that trap sea salt and dirt deposits. Over time these deposits can cause staining and etching, making cleaning progressively more frequent and difficult.

Stainless steel surfaces on boats such as railings are also exposed to the harsh corrosive effects of the saltwater. Corrosion and 'tea staining' can form as a result of constant exposure to saltwater environments. Many acidic cleaners that are used to treat corrosion that develops on stainless steel can accelerate and increase the return rate. EnduroShield® will eliminate the need to use those cleaners, and dramatically slow the corrosion process

## Showers and Bathroom Glass

EnduroShield is an ultra-thin transparent coating that completely adheres to the surface and provides protection that will repel both water and oil based stains. Similar to a non-stick fry pan, cleaning is made easier using only water and a mild detergent or with a microfiber cloth. No longer is scrubbing with harsh toxic cleaners needed, EnduroShield makes cleaning a breeze. The superior protection also helps prevent the build-up of mould and harmful bacteria, promoting a germ free environment.

Untreated glass, tiles and grout surfaces are porous and as a result absorb mineral deposits and soap scums, making it very difficult to clean.

EnduroShield can be applied to all new or existing bathroom surfaces.
