

Reln is a multi-award winning and quality-endorsed Australian company, known for designing and producing innovative quality plastic products for the Australian and international markets.

Widely acclaimed in both industry and environmental forums, Reln manufactures its own lines of domestic and industrial products with applications as diverse as surface water drainage, plumbing, agriculture, aquaculture and gardening. Reln also provides design and product management for leading manufacturers in the packaging, automotive, medical, electronic goods and consumer industries.

The RELN Surfacewater Drainage products range has now been expanded to include the brand new Architectural Grate. This exciting addition to the popular range features a stunning design, superior strength and maximum durability. The new Architectural Grate provides the ultimate surface water

drainage solution that will enhance any outdoor area. It's smart, modular design makes it ideal for both domestic and light commercial environments. Manufactured from the highest quality electro polished 316 stainless steel to Class A specification

RELN Stretch Drain™ is a new and innovative flexible and expandable 100mm drainage pipe system that is super easy to handle and install, saving precious time and effort. Stretch Drain is ideal for use in applications where collection, dispersion and control of sub-surface groundwater are required.

The brand new Storm Masta® is a large capacity surface water drainage system & is the perfect solution for collection of high surface water flows, in large domestic and light commercial applications. With a high intake class B galvanised steel grate, large 200mm channel depth/width, specially shaped self cleaning channel base, and multiple outlets for 150mm PVC stormwater pipe, Storm Masta® is designed to efficiently clear high flows of stormwater
