

Colormaker Industries is a specialist manufacturer of quality surface coatings products.

Colormaker's success is founded on dedication and commitment to developing industry-leading products through extensive research and development.

Australian and privately owned since foundation, Colormaker has developed numerous innovative coating products.

## Leading brand pool coatings

**LUXAPOOL** is Australia's largest selling brand of premium swimming pool paint and has been the performance benchmark in pool finishes for over 40 years.

### **LUXAPOOL (2-pack) Epoxy Pool Coatings**

Excellent for all new swimming pool applications, but can also be used to give a beautiful luxury finish to older pools and is well suited to application over old and new cement render, fibreglass, marblesheen and previously painted epoxies.

### **LUXAPOOL Chlorinated Rubber Coatings**

Has been formulated for use over old or new concrete based swimming pools. It has been especially formulated to resist the destructive effects of swimming pool chemicals and has a well-proven record of longevity along with durability.

**LUXAPOOL** is available in a wide range of standard colours, with specific colour matching available to complement any design or project.

## Water-based textile screen printing range

Colormaker has revolutionised the industry with the development of a range of water-based textile inks and ink that offers superior performance and eliminates the historical trade-off between printability performance on the screen and post-production performance of the finished product.
